The information collection requirements contained in Section 80.413 require the licensee of an on-board station to keep equipment records which show:

- (1) The ship name and identification of the on-board station;
- (2) The number of and type of repeater and mobile units used on-board the vessel; and
- (3) The date the type of equipment which is added or removed from the on-board station.

The information is used by FCC personnel during inspections and investigations to determine what mobile units and repeaters are associated with on-board stations aboard a particular vessel.

If this information were not maintained, no means would be available to determine if this type of radio equipment is authorized or who is responsible for its operation. Enforcement and frequency management programs would be negatively affected if the information were not retained.

In each case these persons must enter into a written agreement verifying that the ship station licensee has the sole right of control of the ship stations, that the vessel operators must use the ship stations subject to the orders and instructions of the coast station or marine utility station on shore, and that the ship station licensee will have sufficient control of the ship station to enable it to carry out its responsibilities under the ship station license. A copy of the contract/written agreement must be kept with the station records and made available for inspection by Commission representatives. The information is used by FCC personnel during inspection and investigations to insure compliance with applicable rules.
